

# GDA

garage door alarm

Battery Operated • No Wiring • Easy Installation

## DESCRIPTION

The Garage Door Alarm (GDA) can be installed on overhead doors for home garages, rental garages (without electricity), warehouses, commercial buildings, strip malls shipping doors, and storage buildings.

The wireless Garage Door Alarm provides security and protection for valuable garage contents by providing an early warning for break-ins. It may also help detect dangerous door malfunctions that can cause personal injury, especially to small children. The cost is a fraction of alarming an overhead door any other way.

## FEATURES

- Adjustable entrance delay timer (2 seconds to 7 minutes)
- Exit delay timer (4 minutes to 8 minutes)
- Alarm duration timer (4 minutes)
- Detects motion of door opening
- No false alarms
- Works on automatic or manual overhead doors
- Extremely loud dual buzzers
- Battery life indicator light
- Alarm tripped indicator light
- Security key switch operation
- Provision for auxiliary exterior door switch
- Fast mounting kit for all door types

## APPLICATIONS

- Residential garages
- Rental garages
- Warehouses
- Commercial buildings
- Strip mall shipping doors
- Storage facilities
