

RES-COM 2000

adapts residential radio controls for commercial use

RES-COM 2000

DESCRIPTION

Res-Com 2000 is designed to adapt standard residential single-button radio controls for use with traditional three-button (open, close, stop) commercial operators.

The up...*stop*...down...*stop* rotation of *Res-Com 2000* allows your customer the same features of a more expensive commercial radio without the added cost. *Res-Com 2000* works with most residential radio receivers, making it more cost effective.

& BENEFITS

FEATURES

Dealer's Choice

Res-Com 2000 is compatible with most residential radio controls, giving you the option to use the radio you most prefer for commercial jobs.

Easy Installation

A simple 8-wire hook-up is used to connect *Res-Com 2000* to the 3-button station (24V-110V), making installation quick and easy. Input power requirement: 24VAC.

One-Button Operation

One-button performs the functions in rotation: up...*stop*...down...*stop*, allowing the commercial door to be parked in either direction.

Cost Effective

Quick, simple – in one small package.

Commercial use RES-COM 2000
